Foreword	7
ADAMCZYK J. The effect of scaling methods on the calculation of environmental indices.....	9
BĘDKOWSKI K., STEREŃCZAK K. Sessile oak (<i>Quercus petraea</i> (Mattuschka) Liebl.) trees variability according to an analysis of multispectral images taken from UAV – first results	25
CHILIŃSKI M. T., OSTROWSKI M. Comparison of the results of the modified NDVI indicator established on the basis of the measurements by hyperspectral spectrometer and digital camera	35
KUPIDURA P. CMAF – CHRIS Morphological Adaptive Filter	43
MENDYK Ł., MARKIEWICZ M., ŚWITONIAK M., BEDNAREK R. The use of orthophoto map for soils mapping of dwindling lakes catchment areas: a case study of Sumowskie Lake, NE Poland.....	57
ORYCH A., WALCZYKOWSKI P., DĄBROWSKI R., KUTYNA E. Using plant spectral response curves in detecting plant stress	67
PLUTO-KOSSAKOWSKA J., OSIŃSKA-SKOTAK K., FIJAŁKOWSKA A., CHMIEL J. Use of remote sensing in control of good agricultural and environmental conditions on agricultural farms	75
STEREŃCZAK K., BĘDKOWSKI K. Assessment of the Scots pine (<i>Pinus sylvestris</i> L.) crowns density based on multispectral images obtained by unmanned aerial vehicle	89
ŚWITONIAK M., BEDNAREK R., MARKIEWICZ M., PALUSZEWSKI B. Application of aerial photographs for the assessment of anthropogenic denudation impact on soil cover of the Brodnica Landscape Park plateau areas	101
ZIOLKOWSKI D., TURLEJ K., BOCHENEK Z. Indicators of environmental diversity derived from remote sensing based land cover maps – spatial and thematic aspects	113
